## Key Skills

HTML5  
CSS3  
JavaScript ES6+  
Tailwind CSS  
Bootstrap  
Next.js  
React.js  
Python  
Django  
RESTful APIs  
Node.js

## Interest and Activities

Gaming  
Art  
Photography  
Volunteering  
Music  
Reading  
Traveling

## Profile

Experienced web developer proficient in building attractive and responsive websites using HTML5, CSS3, and JavaScript. Skilled in React, Next.js, Node.js Django and Python for creating dynamic web applications. Familiar with databases (sqlite, postgres) and implementing RESTful APIs for data communication.

Proficient in version control (Git, GitHub) and using modern web tools like Tailwind CSS and Bootstrap. Completed real-world projects, showcasing expertise in crafting functional websites. Ready to bring innovation and create exceptional web solutions.

## Experience

*December 2021—June 2022*

Software Developer Intern, Criset Multiconcept Services, Abuja, FCT

- Writing code under the guidance of senior developers to implement new features or resolve bugs in software applications.
- Assisting in testing software to identify and fix issues or errors (bugs) before deployment.
- Creating and maintaining documentation for code, APIs, and software features to ensure clarity for future reference.
- Participating in code reviews with senior developers to learn best practices and improve code quality.
- Staying up-to-date with the latest technologies, tools, and programming languages relevant to the project and software development in general.

*October 2017- September 2019*

System Administrator, Edo State Polytechnic, Usen, Edo State

- Installing and configuring hardware, operating systems, software applications, and network devices are fundamental tasks of a system administrator.
- Performing regular system maintenance tasks such as updates, patches, and backups to ensure the systems run smoothly and securely.
- Configuring and managing network devices, such as routers, switches, and firewalls, to maintain a stable and secure network infrastructure.
- Troubleshooting: Identifying and resolving hardware, software, and network issues encountered by users or detected through monitoring tools.

## Education

*May 2023*

Bachelor of Science in Computer Science • University of Abuja •  
Gwagwalada, Abuja

*September 2019*

Diploma in Computer Science • Edo State Polytechnic • Usen, Edo State

## Courses and Certifications

*July 2023*

Node Js – The Complete Guide (MVC, REST APIs, GRAPHQL, DENO)  
UDEMY

- Mastered Model-View-Controller (MVC) architecture to build scalable and maintainable web applications.
- Learned to create robust REST APIs, enabling seamless communication between client and server applications.
- Gained expertise in GraphQL, a modern query language for APIs, and integrated it into backend services.
- Expanded knowledge with Deno, a secure runtime for JavaScript and TypeScript, to explore alternative server-side options.
- Completed hands-on projects, including building RESTful APIs and implementing real-time features using WebSocket technology.

*May 2022*

The Ultimate 2022 Fullstack Web Development Bootcamp  
UDEMY

- Acquired proficiency in frontend web development, including HTML5, CSS3, and JavaScript ES6+, and learned to create beautiful and responsive websites using Bootstrap 5.
- Mastered DOM manipulation and utilized jQuery to enhance interactivity and user experience.
- Developed advanced skills in backend web development using Python, Django, enabling me to build scalable and dynamic web applications.
- Learned to work with databases, including sqlite and postgres, and implement RESTful APIs for efficient data communication.
- Gained valuable experience in version control using Git and GitHub.
- Explored modern web development tools and technologies, such as React.js, to build interactive user interfaces and enhance frontend functionalities.
- Completed multiple projects, applying the learned skills to realworld scenarios, and gained hands-on experience in crafting fully functional and visually appealing websites.
