PROFILE

Experienced software developer with expertise in Next.js and React for building web apps and PWAs. For styling, I use Tailwind CSS, Chakra UI, and Bootstrap to craft interactive and responsive UI, and Redux Toolkit for state management. I am familiar with design tools such as Figma and Adobe XD. With skills in JavaScript and TypeScript, I specialize in integrating RESTful APIs and have backend experience with Python/DRF as well as Node.js and Express. I am well-versed in Git, GitHub Actions, Docker, and AWS for CI/CD, and use Postman and Swagger for API testing and documentation. I am eager to contribute to software development projects with a passion for technology and delivering high-quality solutions.
